

REMARKS

The Applicants respectfully request the cancellation of Claim 12. The limitations recited in that claim are not technically consistent with those described in independent Claim 11. As such, it is requested that Claim 12 be cancelled prior to issuance of the patent under CFR §1.312. The Applicants also request that Claim 13 be amended to reflect proper dependency on Claim 11.

Summary

In light of the above amendment, consideration of the subject patent application is respectfully requested. Any deficiency or overpayment should be charged or credited to Deposit Account No. 500282.

Respectfully submitted,
